CHAPTER – II MORE ABOUT THE WRITTEN TEST

1. SYLLABUS

The question papers of the Common Entrance Test will be mostly based on the First and Second PUC syllabi prescribed by the Department of Pre-University Education of Karnataka State.

2. DURATION, QUESTION PAPER AND OMR ANSWER SHEETS

The Common Entrance Test will be held in TWO days in FOUR different sessions for four subjects. On the first day, test will be conducted for Biology and Mathematics subjects in two sessions and on the next day test will be conducted for Physics and Chemistry subjects in two sessions as per the date and time given at page – 2 & 12. Each paper will be conducted for 60 marks each with 80 minutes duration.

Each question paper will be of (Objective) Multiple Choice type. The question paper in each subject will be in 16 different versions and each question will have four different options. Each question will carry ONE mark. The candidate is expected to attempt all the questions, in order to obtain maximum marks. In other words, there is no choice among questions. **THERE WILL BE NO NEGATIVE EVALUATION WITH REGARD TO WRONG ANSWERS BUT MARKS WILL NOT BE AWARDED IN RESPECT OF MULTIPLE ANSWERS.** The version code of the question paper will be boldly printed on facing sheet of the question paper. The version codes used in each paper will be from A - 1 to A - 4, B - 1 to B - 4, C - 1 to C - 4 and D - 1 to D - 4. The version code of the question papers given to a student may be different OR may be the same for different sessions.

COMPULSORY: In all the four sessions, initial TEN minutes will be given for the candidates to write / shade the particulars such as Name, CET Number, Version Code and Serial number of the question booklet on the OMR answer sheets in the boxes provided. The candidates who do not write / shade the correct CET Number and Version Code on the OMR answer sheets, such candidates OMR answer sheets will not be scanned and will not be assigned any rank.

The candidates will have to mark correct options on the Optical Mark Reader (OMR) answer sheet, which will be supplied at the beginning of each session of the test. Among the answers provided against a question, only one answer will be correct. The candidate should mark the correct answer by completely shading only one circle against a question number, using BLUE or BLACK ink ball point pen. More details about precautions to be taken while filling the particulars on OMR answer sheets is given below / next page. The OMR answer sheet comprises of two sheets. The top sheet will be used for the purpose of marking correct answers and later scanning & evaluation and the bottom sheet will be returned to the candidates after completion of each session of the test. The bottom sheet is coated with a special kind of chemical which acts as Carbon. When the candidate fills the circles on the top sheet, the pressure on the bottom sheet will automatically create a replica of the top sheet.

The candidates are required to **COMPULSORILY AFFIX THEIR LEFT HAND THUMB IMPRESSION** in the space provided on the bottom portion of the OMR answer sheet (top sheet) with the ink-pad provided by the room Invigilator, after completion of each session of the test. However, they need not affix their thumb impression on the replica (bottom sheet) of the OMR answer sheet. Thereafter, the invigilators will detach the bottom sheet from the top sheet at the perforations and hand over the bottom sheet replica to the candidates and candidates are allowed to carry the same with them. The top sheet will be retained by the invigilator for returning the same to the Deputy Chief Superintendent of the examination center and in turn to KEA.

NOTE: The OMR answer sheets in respect of all the candidates who have affixed their left hand thumb impression will only be scanned and the results in respect of such candidates will be published. The OMR answer sheets in respect of candidates who have not affixed their left hand thumb impression, for any reason, will not be scanned. Also, the results in respect of such candidates will not be published.

Optical Mark Reader sheets as Answer Sheets

A model of the Optical Mark Reader (OMR) sheets that will be used for marking the answers by the candidates will be hosted on the KEA Website. The need for the replica has compelled us to design OMR sheet in such a way that all the information and the answers are marked only on one side. The top portion of the sheet is meant for furnishing the particulars about the candidates such as the Name, CET Number, Version code and serial number of the question booklet. The bottom portion is meant for marking the answers, affixing the signature of the room Invigilator & candidates and also for affixing the Left Hand Thumb Impression of the candidate. The space meant for the subject would have been pre-marked. The square blocks in each item should be filled by the candidate in capital letters and numbers. The circles corresponding to the letters or numbers are meant to be completely shaded using blue or black ink ballpoint pen only.

Why Ball Point Pen?

Remember, we are allowing the candidates to carry home a replica or facsimile of the OMR answer sheet and the OMR answer paper comes in a set of two sheets. When you shade the top sheet, the pressure will create a dark mark on the bottom sheet on the corresponding circle. If a pen with a nib is used, the pressure on the top sheet will not be sufficient to activate the chemical on the bottom sheet. On the other hand, a ballpoint pen exerts sufficient pressure to convert the bottom sheet chemical into a dark spot. That is why we want you to use a blue / black ink ballpoint pen only.

3. SPECIMEN OF THE OMR ANSWER SHEET

By using blue or black ink ballpoint, candidates can practice with the OMR answer sheet with regard to filling and shading of the required items. Please study the specimen OMR answer sheet and familiarize yourself. Take four to five photocopies of the specimen OMR sheet and practice on them at home. By doing so, you will be very accurate in writing and shading the particulars such as Name, CET Number, Question booklet version code, etc., in the required manner on the Original OMR answer sheets, during actual conduct of the test.

Important precautions to be taken while writing / shading Top portion of OMR answer sheet
The initial TEN minutes will be given to a candidate, for writing / shading the particulars on the top portion of the OMR answer sheet, wherein the candidates are required to write their Name within the boxes, write their CET Number in the boxes and shade the respective circles, write the Question booklet version code in the boxes and shade the respective circle in the required manner. The candidates are also required to write the Question booklet serial number. The entries pertaining to 'Name', 'CET Number' and 'Question booklet Version code' are very crucial ones. Therefore, candidates are advised to take extra precaution while writing and shading these three items accurately on the top portion of the OMR answer sheet.

Important precautions to be taken while shading answers on bottom portion of OMR Answer sheet

After the initial TEN minutes 70 minutes will be given to a candidate for shading the answers on the bottom portion of the OMR answer sheet. On the bottom portion, there will be 60 rows corresponding to 60 questions. Against each question number, four circles will be provided corresponding to four options of the question paper. The candidates are required to shade only one circle corresponding to the correct answer.

The scanner is so sensitive to black and blue ink shades that even a slight residual ink mark or an unintended ink dot within a circle on the OMR answer sheet will be taken by it, as filled / shaded, at the time of scanning. Consequently, the candidate may lose marks. Therefore, please do not make any stray pen marks on the OMR answer sheets. As the scoring done by the scanner and the computer in tandem is final, a plea for erasing or neglecting the ink mark on a circle cannot be entertained. Therefore, candidates are advised to take extra precaution while shading the circles on the bottom portion.

THINK BEFORE YOU INK !

Once you darken a circle, there is no way to erase or to remove it. That way, your decision about a correct answer will be final. The invigilator will not permit you to use marker, white fluid or any other device to hide the shading already done and you will not be supplied with one more set of OMR sheet. If you spoil a sheet in your attempt to rub off the shading done on a circle, you may ruin your opportunities. If two circles are shaded in a row and even if one of the circles is partially rubbed off, the scanner will take it as a multiple attempt. Therefore, think twice before you shade a circle with ink. Darken only one circle for each question as shown against the CORRECT METHOD.

The candidates should invariably preserve their 'CET 2013' OMR answer sheet replicas of all the subjects for a minimum period of one year from the date of obtaining the admission order.

The determination of interse merit as detailed above for selection of Government seats will be the basis for the merit list of candidates claiming benefit of reservation under Admission Rules i. e., Item 8 of Chapter – I of the brochure.

(B) PUBLICATION OF MERIT LISTS:

After the completion of the entrance test, the ANSWER KEY will be published on **07-05-2013** in the KEA Website: <http://kea.kar.nic.in> The candidates / parents / lecturers can file their objections, if any, addressed to the “Executive Director, Karnataka Examinations Authority, Bangalore” on or before **11-05-2013** either in person or only through SPEED POST / email: keauthority-ka@nic.in, with regard to any of the published answer Key, along with all supporting documents / justification. The objections received by the KEA will be placed before an Expert Committee, whose decision will be final for determination of the right answer key. The answer key approved by the Expert Committee will be applied during evaluation for determination of merit order.

As per the merit determined by the KEA, the Medical / Dental, ISM & H, Engineering and Architecture ranks will be assigned to the eligible candidates. Separate result sheets showing the Medical / Dental, ISM & H, Engineering and Architecture ranks will be published on **27-05-2013** in all the CET-2013 examination centres and the same will also be made available on KEA Website <http://kea.kar.nic.in> Separate merit lists in respect of the wards of Jammu & Kashmiri migrants for the respective courses will also be prepared and published on the KEA Website. The correct answer key and the list of candidates whose results have been withheld and the reasons for withholding the results will also be published along with the results. The candidates whose results are withheld for want of 2nd PUC / 12th std. Marks and date of birth such candidates / parents need not to be worried because, ranks will be assigned as and when they submit the required documents on the specified dates during office hours.

Result sheets will not be displayed in the KEA premises.

Candidates who have any objections in respect of any of the entries or problems in the result sheets, such as discrepancy / changes in the Q. E. marks, version code, NATA scores etc., except the marks secured in the Common Entrance Test, can submit their objections within three days from the date of publication of the CET - 2013 result and thereafter result will be published for such candidates. (See box item given below for details about intermediary ranks / Spot ranks i.e., ranks ending with G55, G44, G33 etc.)

NOTE: 1. The candidates are requested to verify their qualifying examination marks printed on the result sheets without fail, if there is any discrepancy with reference to qualifying examination marks the same should be brought to the notice of this office immediately for fresh assignment of ranks, if any.

2. Candidates whose results will be withheld for want of qualifying examination marks should submit a photocopy of their Q. E. marks card either in person or through 'Speed Post' to the KEA and the ranks in respect of such candidates will be published subsequently.

Request for re-totalling or revaluation of the OMR answer sheets will not be entertained, as the valuation and the subsequent scoring will be error free.

What does 'G 55' mean?

After the declaration of the results, the candidates may not get ranks assigned mainly for the following reasons :

- 1) For want of Q. E. marks, a candidate might have missed the rank. 2) A candidate might have marked the version code wrongly.
- 3) Q. E. marks may get varied due to revaluation or otherwise, when corrected, a fresh ranking becomes necessary.

The KEA computers are programmed to assign new ranks or fresh ranks to the candidates falling within the above said categories without disturbing the rank numbers assigned to the candidates whose results were declared earlier.

The computer program is such that it can assign ranks in between two integers without altering the previous rank numbers. Undoubtedly, you were assigned a rank after the declaration of the results. When a rank was assigned to you, rank 1234 and 1235 had been assigned to two other candidates. When it came to assigning a rank to you, the computer found that in the normal course, your rank would have been after the candidate with rank 1234 and before the candidate with rank 1235. Therefore, the computer had to place you between 1234 and 1235.

As already said, the computer is programmed to generate large number of ranks between two integers by dividing the space alphabetically from A to Z. Then each alphabet is subdivided from 1 to 99. Now, if a new rank is required to be assigned between two integer ranks, in the first instance, the computer assigns a division number as 'G 55' before the previous rank. If one more rank needs to be assigned between the rank 1234 and 1234 G 55, the computer assigns a rank as 1234 G 44. If one more rank is to be assigned between 1234 G 55 and 1235, then it assigns a rank as 1234 G 66.

Your interest in the discipline, college infrastructure, course, distance from your place, availability of hostel etc may be some of the issues to guide your choices of options and advice of your parents. As it will save your time and minimize your chance of making mistake in option

(iii) Please enter URL or Website address <http://kea.kar.nic.in> or as indicated in the notification. Upon entry of URL you will find link like **“UGCET-2013–OPTION ENTRY”** and select the links regarding the information on many items.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

Preparatory work at home:

Allotment of seats depends entirely on the priority of options given by the candidates as per the merit / rank. Hence it is of utmost importance to familiarize oneself with the operation of the computer, the locking of seats so that the correct choice and options are entered. Practice of entering of options has to be undertaken as even an expert in computers would require a minimum of one hour for entry of about 500 options. Familiarity with the computer, prior knowledge of the college, course is essential to fill up options. Even a small mistake in entering the options may deprive a valuable seat in the desired college / course even though he / she is eligible for that seat as per his / her rank. Therefore, KEA suggests that the student should familiarize themselves in entering the options in the online option entry form. A home work of about an hour everyday is necessary for the students to familiarize themselves with the allotment. The following steps may be taken by the candidates before entering their options in the online option entry form.

- The candidate should note the name of the college, the course offered in a separate sheet of paper.
- The cut off rank for that particular college and course may be seen so that the candidate will know where he stands vis-à-vis his ranking.
- Preparatory work should be commenced only after asserting their merit / rank order.
- The priority of options among the colleges selected should be noted down.
- Each candidate will be given an online allotment e-tutorial CD when they come for verification of documents. This will help the students to familiarize themselves with online seat allotment.
- KEA will also offer training at the Helpline Centres to the candidates to familiarize them with the entry of options as per their choice.
- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the Admission Round, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats. Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.
- The verification slip issued to the candidates indicates the category which he / she belongs, rank number for each discipline to which he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.
- It is better to write the order of options on a white paper and discuss the same with your parents / guardians / mentors etc before actually entering in the system.

CUT OFF RANK: The cutoff ranks for 2012-13 and for earlier years for all discipline college wise, course wise and category wise is hosted on the KEA website <http://kea.kar.nic.in>. The cut off rank shows the name of the college, course,

category and the last rank in the particular college for a particular course during 2012-13. **The cutoff rank is only for the information of the students and no inference shall be drawn on the availability of seats college wise and course wise for the year 2013-14. KEA does not take any responsibility whatsoever in this regard.** The cutoff ranks give a fair idea about the last rank under each category admitted to a particular college / course during the previous year. It's only for the information of the candidates to help them in exercising their options.

The entire process of allotment is controlled by sophisticated software and high end computers which examine minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, discipline which he is interested in. For example if a candidate is interested only in Medical seats then he can give all the options in all the colleges for allotment of Medical seats only. There are 38 Medical colleges and the candidates can give 38 options. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly a candidate may be interested only in Engineering and he may opt for a particular course in a particular college as per his choice. For example suppose a candidate is interested in Electronic branch only, then he can give his preference for Electronic course only in all the colleges. There are 190 colleges and he can give 190 options. The computer will pick up the best options available as per merit and order of options. In other words the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

If a candidate is eligible for both Medical and Engineering discipline and his first desire is the Medical Stream then in such case he has to give as much options as possible for Medical. The order of preference for Medical should be more than other disciplines. The computer in such case will find the best options as per the rank and allot a seat to the candidate.

Likewise if a candidate is interested only in Engineering he may skip the option of giving choice for Medical and concentrate only on Engineering courses. Even in Engineering stream if the candidate is particular about a particular course then he has to give more options for that particular course in his options.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

Preparatory Home Work before Option Entry:

As we have been telling you there is preparatory homework to be done very specifically before you are set to key in your Options. Your guiding factors are-

- i) Your Rank in each discipline – that is Medical / Engineering / ISMH / Architecture
- ii) Your choice of stream-whether you want to limit your options to Medical / ISMH and Engineering / Architecture OR Medical only OR Engineering only
- iii) Cut Off and Entry Ranks of the earlier years
- iv) Seat Matrix issued this year by the Government which will be available on our Website and Helpline Centres as soon as it is issued by the Government.
- iv) Whether you come under any Category?
- v) Whether you are eligible for allotment under the Supernumerary Quota for engineering seats?
- vi) Choice of college-its faculty, results of the previous years, infrastructure, placements, and availability of good hostel facility-please also visit the AICTE and the MCI / DCI Website for details on colleges.

The Option Work Sheet is there; you can take a print out of the same and start writing your options. Discuss with your parents, family, and friends. Finalise your Options, write it down. Now you are set for entry of your Options.

KEA is very keen that every candidate should fulfill her or his merit / rank and true potential and that can happen only if you spend some time writing out your options.

The date and time for beginning Option Entry will be notified in the Newspapers, KEA Website and in all Helpline Centres. Candidates are required to pay attention to the same and should key in their Options before time and last date for option entry. KEA will not be responsible if any candidate claims ignorance of the schedule for Option Entry and fails to key in options within the specified time and date period. Candidates are advised not to wait till the last time and date but should key in their options well within the last date and time specified. KEA will not be responsible if a candidate fails to key in his / her options due to any reasons.

NOTE ON MOCK ALLOTMENT

After the entry of options are completed, based on the real data mock allotment will be carried out and the allotment status will be hosted on the KEA website for the information of the candidates. Two days time will be given to the candidates to verify the status of their allotment. Here, the candidate after ascertaining college and course allotted, if he / she wants to change / modify his / her options can do so within the stipulated date and time. Then based on the modified entry of options the real allotment will be carried out.

WHY DO WE CONDUCT MOCK ALLOTMENT?

Based on the Mock Allotment a candidate can know his / her status of allotment as per his / her priority of options. This gives a clear view to the candidate to change or retain the entered options. Candidate can come to know that the other candidate with lower merit has got seat which he was eligible but for his not entering that option. Therefore, candidates will be given one more choice to change the priority of options, deletion of or addition of options.

Due to change in the options by candidates after Mock Allotment, one may not get the same seat in the real allotment as was allotted in the mock allotment.

Candidate's Options Entry

(Your Priority Number (or your ranking for your seat option))

Candidates have to enter priority which is given in Numbers. Your priority number starts from 1 and ends in 999 against each course of particular college of specific course stream. The priority number is unique number for each course of all Streams. There will not be any separate priority number for each discipline i.e., Medical, Dental, Engineering, Architecture and ISM&H. The Priority number is common for all the disciplines.

For instance, if you are giving priority number 1(one) for Medical then that number should not given to any other courses of the other discipline such as Architecture, Engineering & ISM&H. While selecting course in another stream the priority number should be given 2 (two), 3 (Three), 4 (Four)..... as per your ranking preference.

The following example table will give an idea of entering options, disciplines, and course details.

Course Stream	Course	Priority of Option	Course Stream	Course	Priority of Option
Medical	M001ME	1	Medical	M024ME	6
Engineering	E001EE	2	Engineering	E001CS	7
Architecture	E041AR	3	Medical / Dental	M101DE	8
ISM&H	I701AY	4	Medical / Dental	M448DE	9
Medical	M021ME	5			

The above table is only indicative and no inference can be drawn from it.

There is no limit for entry of options and a candidate can enter any number of options as he / she wishes to exercise on his / her own priority. Candidates are advised to enter more number of options to avoid the disappointment of not securing a seat. Any candidate has to enter the option in the priority as he / she desires. Candidates are advised to do thorough home assignment regarding the choices which they want to exercise, the college which they prefer, the course which they are interested to join etc. It is better to download the option entry sheet and discuss the same with your parents / guardians / mentors etc before actually entering same in the system. Your interest in the discipline, college infrastructure, course, distance from your place, availability of hostel etc may be some of the issues to guide your choices of options and advice of your parents. As it will save your time and minimize your chance of making mistake in option entry on the online option entry form. The allotment will not proceed to the next rank candidate till the list of your options is completely searched for availability of a seat. The candidate may change the options as many times as he / she desires before the last date and time notified for entry of options.

Options recorded in the server on the last day and time of the notified schedule in each round will be frozen and only the frozen options will be considered for allotment of seats.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences. In order to avoid last minute rush candidates are advised not wait till the last day and KEA will not be responsible for any network related problems.

NOTE:

1. Candidate can enter options for more than one discipline Medical / Dental and Engineering or for Engineering and Architecture or for Engineering and ISM & H disciplines to which he / she is eligible.

FLOW CHART FOR ADMISSION ROUND

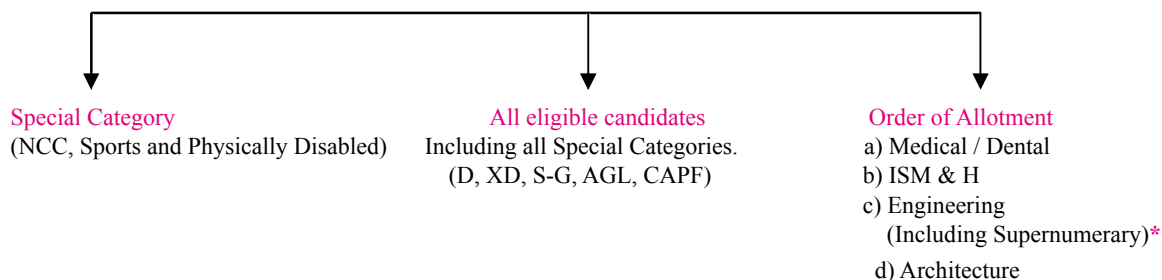

ILLUSTRATION FOR ALLOTMENT OF SEAT

After the verification of documents and excising options by the candidate the seats will be allotted as in previous years in three rounds i.e., (1) Admission Round (2) Casual Vacancy Category Round (3) Casual Vacancy Round

The following system will be followed for allotment of seats. Here is a sample illustration of choice of options by a candidate:

Name of the candidate: Uma

Category: GM Medical Rank: 262 Engineering Rank: 1200
 Architecture Rank: 140 ISMH Rank: 300

In this case the candidate is interested only in Medical seat. Hence her priority of options will be Medical only and he has given the following options

Priority Number	Options	Priority Number	Options
Option 1	M001M	Option 6	M025M
Option 2	M013M	Option 7	M004M
Option 3	M003M	Option 8	M041M
Option 4	M051M	Option 9	M024M
Option 5	M031M		

The computer starts Medical Round allotment with Rank 1. Then after completing allotment till rank 261, it reaches rank 262. Uma's Medical rank is 262 and hence option number 1 is not available. Similarly option number 2 is not available as the candidate above her rank has already been allotted and no vacancy exists. The next option is 3 and the college code is 3 and that option is available. Hence the computer will allot option number 3 to the candidate. The candidate can now download her allotted details and join the college and report her joining status to KEA through the Option Entry Portal, if she is satisfied with the allotment otherwise she has to exercise her options and exercise fresh options in the next round after verifying the availability of seats. The option exercised is now number 3 and the college allotted is number 3.

Name of the candidate: Heeba

Category : 3B
 Medical Rank : 850
 Engineering Rank : 1450

Priority Number	Options	Priority Number	Options
Option 1	E003EC	Option 6	M102D
Option 2	E005CS	Option 7	M015M
Option 3	M002M	Option 8	E010CE
Option 4	I702A	Option 9	E010CS
Option 5	I801H		

The candidate is considered as per her rank in each discipline as per her options in the order of priority mentioned by the candidate.

The allotment starts with the Medical discipline. All candidates who have a Medical rank will be considered and their options will be noted by the computer. In the instance case her Medical option is 3 hence, the first two options which are Engineering options will not be considered during Medical allotment stage.

CASE I:

At Stage I: - During Medical seats allotment the candidate is picked as per her Medical rank. All her Medical options are considered i.e., 3, 6 in the order of priority. If the candidate gets her seat for the option of priority no.6 (Medical, 102, D) then the seat will be allotted. The choice list for further stages like Engineering, ISMH, Architecture etc., will be reduced to priority from 1 to 5.

At Stage II: - During ISMH seats allotment the candidate is picked as per his/her ISMH rank. All his ISMH options are considered i.e., 4, 5 in the order of priority. The candidate does not get any ISMH seats for that rank, so her Medical seat is retained. The choice list from (1 to 5) for further stages will remain unchanged.

At Stage III:- During Engineering seats allotment the candidate is picked as per her Engineering rank. All his Engineering options above 6 (i.e., from 1 to 5) are considered. i.e., 2 in the order of priority. If the candidate gets his/her seat for the options of priority no.2 (Engineering, 5, CS) then that seat will be allotted and the previously allotted seat (Medical – option 3) will be returned to the seat matrix. The choice list for further stages like Architecture will be eliminated.

CASE No. II

At Stage I:- During Medical seat allotment the candidate is picked as per his/her Medical rank. All his Medical options are considered i.e., option no.3, 6 in the order of rank and priority. However, both these seats have been allotted to candidates higher in the merit order claiming seat in this round. The candidate is not getting any Medical seat. The choice list for further stages like Engineering, ISMH, Architecture will remain unchanged.

At Stage II:- During ISMH seat allotment the candidate is picked as per his/her ISMH rank. All his ISMH options are considered i.e., 4, 5 in the order of priority. The seat at option 4 is available. The candidate is allotted the ISMH seat at priority no.4 (702, A). Hence, the choice list for further stage like Architecture etc., will be reduced to priority 1 to 3.

At Stage III:- During Engineering seat allotment the candidate is picked as per his/her Engineering rank. All his Engineering options above priority 6 (from 1 to 5) are considered i.e., 1, 2 in the order of priority. If the candidate gets his/her seat for the option of priority no.1 (Engineering, 3, EC) then the seat will be allotted. The choice list for further stages like Architecture etc., will be eliminated.

CASE No. III

At Stage I:- During Medical seat allotment the candidate is picked as per his/her Medical rank. All his Medical options are considered i.e., 3, 6 in the order of priority. If the candidate gets his/her seat for the options of priority no.6 (Medical, 102, D) then the seat will be allotted. The choice list for further stages like Engineering, ISMH, Architecture will be reduced to priority from 1 to 5.

At Stage II:- During ISMH allotment the candidate is picked as per his/her ISMH rank. All his ISMH options are considered i.e., 4, 5 in the order of priority. The candidate does not get any ISMH rank. The choice list for further stages will remain unchanged (1 to 5).

At Stage III:- During Engineering seat allotment the candidate is picked as per his/her Engineering rank. All his Engineering options above priority 6 (1 to 5) are considered i.e., 1, 2 in the order of priority. The candidate is not getting any Engineering seats. The choice list for further stages will remain unchanged.

At Stage IV:- During Architecture seat allotment the candidate is picked as per his/her Architecture rank. His Architecture rank is not considered since the priority (7) is greater than 5. System assumes that his higher option is satisfied.

The same procedure is followed for all the stages and each stage is known as one iteration. Therefore there may be many iterations in one round. The iteration will stop when the seats are exhausted or the choice of the candidate is over. By this method the candidate gets the best of the best seat as per his choice and options and as per his rank. The candidate can track the allotment of seats in every iteration stage.

Summary:

This illustrates that at each stage, the options are getting shrunk before moving to the next stage, if seats are allotted. If seats are not allotted, the options list remains unchanged.

The seats which are returned back to seat matrix in the process of allotment stages will be allotted to the next candidate as per rank and options. This way there will be a number of iterations till the candidate gets the best seat of his choice governed by rank. This means, the system halts allotment when no seats are available for a candidate as per his options.

All the stages taken together as detailed above will form one round and the stages mentioned above, are known as iteration stage. The iteration stage in each round will go on as long as the choice of the candidate is not fulfilled or the availability seat is not exhausted. In this way each candidate will get either a Medical seat or an Engineering seat or ISMH seat as per his/her rank and priority in the respective disciplines. However it is possible that if all seats are exhausted then a candidate might not be allotted a seat at all. Therefore it is very important to candidates to give their options/choices very carefully and after considerable thought and after discussing with their parents and elders. If by chance the options given by the candidate is not well thought he may lose a seat in a good college as he may not have given option for that particular college or would have given lower options. For example a candidate is interested in college A, but by mistake or by oversight he has given a lower preference for that college and has given higher preference for some other college. The computer then will allot a seat as per his rank and as per his higher priorities. In this way he may tend to lose a seat in the college of his choice merely because he has not given a correct priority of options.

The iteration stage starts with Medical/Dental seats, and goes on till the Medical seats is exhausted or choice of candidate is exhausted. Similarly in the 2nd iteration stage the choice of the candidates in ISMH discipline is considered and in the 3rd iteration stage the choice of candidates in Engineering is considered and finally the 4th iteration stage the choice of the candidate for Architecture discipline is considered. If the candidate has given his first choice as Engineering and 2nd choice as Medical then in the 1st stage of iteration the Medical seat at option no.2 will be considered and a Medical seat will be allotted to him as per his priority and rank if seats are available. So in the 1st iteration the candidate will get a Medical seat and immediately in the Engineering iteration stage the candidate will be allotted the Engineering seat as per his rank and priority by cancelling the Medical seat as the first priority is engineering. The Medical seat so cancelled will be added to seat matrix of the same college and category and allotted to the next candidate as per his/her rank and priority. Therefore the candidate ultimately gets the seats of his choice/priority. In the final analysis the candidate gets the best of the best seats of his choice.

After the entire iteration of all the discipline is complete the final list will be announced on the website and this is known as the Admission Round. Therefore, many iterations may take place in one round as per the choice of the candidate and as per the availability of seats. The candidate can track down the movement of seats in the different iteration stages to satisfy himself that the best of the choices is allotted to him. Virtual tracking of the process of allotment by the computer can be viewed by the candidate after allotment. This ensures transparency in the entire allotment stage and KEA is known for its motto **Trust Through Total Transparency**. The final list of the Admission Round will be hosted on the website, in the Helpline Centres and individual allotment will be sent by SMS, e-mail and the candidates are requested to note the allotment of seats to them in the Admission Round. The candidate here has 4 choices. The choices are: -

All candidates who are not satisfied with the choice of seat or course allotted shall necessarily give their willingness for the next round of allotment i.e., the casual vacancy category round. In this round at the first stage all seats available / not allotted or those allotted to candidates and returned back by the candidates to KEA will be put for allotment. In addition in this round all seats in Rural category and Kannada medium category will be converted into the respective GM category of that particular category, for e.g., in category 2A there are 3 seats in Kannada Medium and 2 seats in Rural category these seats could not be allotted in the previous round as there were no candidates available in that particular category, these 5 seats will be converted into 2A General category (2AG) and the same will be consider for allotment to the 2AG category candidates in this round. Additional Detailed explanation for “Non-interactive online seat allotment process”

Option Entry

Candidates can enter the options of multiple disciplines like Medical, Engineering, ISM&H and Architecture together in the order of priority as per their eligibility.

Allotment Procedure

The allotment of a seat for a particular student is based on his/her rank, entered options and availability of seat as per his/her option entered. The detail procedure adopted in the software is given below.

Round : once the document verification is over students are asked to make entry of options. Each option entry has a start date and closing date this is followed by an allotment. The students are asked to entry fresh options multiple times if they are not satisfied of allotment. Each fresh option schedule defines a new round.

Iteration : in each round there is an internal process called iteration. Iteration means trying all the options of the students repeatedly more than once for each stream viz Medical, ISM&H, Engineering and Architecture. During the iterations system tries to allot best option to students without asking fresh options. The iteration cycle is as follows.

- a) Medical
- b) ISM & H
- c) Engineering
- d) Architecture

One cycle of allotment from ‘a’ to ‘d’ mentioned above constitutes one iteration.

- The system is designed to execute the allotment module in multiple rounds and iterations to ensure no seat / option is left out.
- During each round one or more iteration will be executed.
- During the iterations of one round there is a scope of improving the already allotted seat in the earlier iteration in terms of options priority and roster priority as explained below.

Example :

1) Option priority – improving options

Priority	College- course	Priority	College- course
1	E001CS	4	E085EC
2	E003ME	5	E005CS
3	E101CS		

Here the candidate is allotted 5th option in first iteration. In second iteration

Priority	College- course	Priority	College- course
1	E001CS	4	E085EC
2	E003ME	5	E005CS
3	E101CS		

The candidate got 3rd option and leaves seat of 5th option, The candidate has climbed from 5th to 3rd and the remaining lower options are got disabled.

2) Roster priority – improving the same seat above the roster

In iteration 3 system considers the options 1 to 3.

Priority	College- course
1	E001CS
2	E003ME
3	E101CS

Since no seats are available for Option 1 and 2, system tries to improve the roster of 3rd option already allotted (if possible).

Assume that there is a seat available under GM for option – 3 of his/her options entry now the system compare the roster code and allows to return the SCG seat to seat pool and allot GM seat as SCG is lower roster than GM and no SNQ seat available at this stage.

This roster order is given below for SCG roster

Candidate Category	Eligible category	Roster Order
SCG	SNQ	0
	GM	1
	SCG	2

The candidate is allotted an SCG seat in the previous iteration and since a GM seat is available now for option 3, system allots GM seat by leaving SCG seat. This improves the category of seat allotted to roster above.

In the same manner all the categories get improved as per roster. The detailed roster order is published in KEA website.

FAQ's on ONLINE SEAT ALLOTMENT

1. If I opt for allotment of seats what should I do?

A gap of 5 days will be given to the candidates from the date of hosting the allotment details on the website in the Admission Round to exercise their choice of willingness or unwillingness.

If you are satisfied with the allotment of seat, you have to enter the choice as '1' in the website. Then you have to make the fee payment at the Helpline Centre, collect the admission order and join the college before the last date printed on the admission order and immediately through your Log-In-Id report back to KEA (on the Option Entry Website) that you have joined the college. If you do not report back to KEA through your Log-In Account on the

Option Entry Portal, your allotted seat will be cancelled even though you might have physically reported to the college. So do not forget to report through your account to us.

2. Once I opt for allotment of seats, can I come back for the Casual Vacancy Round as I came to know that there are number of seats get added?

No you cannot. The only exception is if additional seat matrix is issued by the Government.

3. Once I opt for Choice -1 and take my allotted seat, and I see that many top rankers above my rank have not reported to the allotted college and therefore many seats are vacant, can I give my options afresh and can I opt for that seat?

No, Choice-1 means that a candidate is satisfied with allotted seat and those who have selected Choice-1 as their option will not be considered for further allotment. Candidates are advised to take an educated decision so that such decision should not create any dilemma for them later.

4. I have cancelled / surrendered my allotted seats, Whether I am eligible to participate in the Casual Vacancy Round?

No, a candidate who has received the admission order and cancelled the allotted seat will have no further consideration in exercising the options for a fresh allotment of seats.

5. When and where I have to pay the fees?

If you are satisfied with the allotment of seat, you have enter the Choice as '1' in the website. Then you have to make the fee payment at the Helpline Centre.

6. How do I have to pay the fees?

Prescribed fees should be paid in the form of Demand Draft drawn in favour of the "Executive Director, Karnataka Examinations Authority" payable at respective helpline centre as the case may be.

7. I have already joined the college during last year and presently I am studying in the college, what are the documents I have to produce to get my seat allotment order?

The Transfer Certificate from the Institution where the candidate is studying needs to be compulsorily got if the candidate is to be issued the Admission Order. The same holds good for candidates who are CET repeaters also.

8. What is Super Numerary Quota (SNQ)?

The AICTE has introduced a Supernumerary Quota in all Engineering Colleges for the year 2013-14. 5% of the seats in each college and in each course will be reserved as Supernumerary Quota. This quota is over and above the seat matrix issued by the Government. For Example, if there are 120 seats in Computer Science in a particular college, the Supernumerary quota for Computer Science in that particular college will be 6 seats. Therefore the total intake in that college for computer science will be 126. All candidates whose parental income is less than Rs.4.50 Lakhs per annum will be eligible for allotment of Supernumerary Quota. The tuition fee prescribed by the Government in that particular college will be waived off. The candidate has to pay the other fees only. **This Supernumerary quota is not available for Architecture Course.** All candidates including General Merit are eligible for allotment of seats under Supernumerary quota if their parental annual income is less than Rs.4.50 Lakhs.

9. How do I become eligible to give an option under Supernumerary Quota?

If the parental annual income is less than Rs.4.50 Lakhs per annum, then such candidate has to produce the Income Certificate issued by the jurisdictional Tahasildar which should be submitted at the time of verification of documents in order to become eligible for allotment of Supernumerary Quota seats. These seats will be allotted in the order of merit and options entered by the candidate.

10. Can I give option for both regular and Supernumerary Quota Seats?

There is no need to give separate options for Supernumerary quota seats. While allotting the seats the software will consider Supernumerary quota seats first for allotment if seats are available and if the candidate is eligible for it.

11. How is Supernumerary Quota seat allotted?

Seats up to maximum of 5% of sanctioned intake per course in each college approved by AICTE will be offered as Supernumerary seats. The software is designed in such a manner that while considering the options entered by the candidate for allotment, the priority in engineering options will be considered first against the Supernumerary Quota seats if seats are available in the order of merit as per candidate's eligibility.
